DETAILED ACTION

Response to Amendment

The Response, filed on March 9, 2009, has been entered and acknowledged by the Examiner. Claims 1-66 are pending in the instant application.

Election/Restrictions

Claims 1, 3-10, 26-36, 40, and 44-50 are allowable. The restriction requirement between groups and species, as set forth in the Office action mailed on February 6, 2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 2, 41-43, and 62, directed to a device of Species A are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sandra Brown on February 23, 2010.

The application has been amended as follows:

The following claims have been cancelled: 11-25, 37-39, 51-61, and 63-66

Allowable Subject Matter

Claims 1, 2-10, 26-36, 40-50, and 62 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, specifically for the limitation of a) mixing a slurry comprising particles of substantially uniform size and a precursor material for a desired metal; b) urging the slurry through an orifice while forcing the particles and precursor material into a combination having a desired crystallographic configuration; c) drying the combination having a desired crystallographic configuration emerging from the orifice; and d) sintering the precursor material, whereby a photonic-crystal filament is formed in combination with other claimed features of the present claimed invention.

Regarding claims 2-10, 26-36, 40-43, claims 3-10, 26-36, 40 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 44, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 44, specifically for the limitation of a) providing a metal filament; b) mixing a slurry comprising particles of substantially uniform size and a precursor material for a desired metal; c) urging the metal filament and the slurry through an orifice while forcing the particles and precursor material into a combination having a desired crystal configuration surrounding the metal filament; d) drying the combination having the desired crystallographic configuration emerging from the orifice; e) sintering the precursor material; and f) compressing the precursor material within a sheath, while drawing the filament and sheath through a series of two or more successively smaller dies, whereby the filament is clad with a photonic crystal in combination with other claimed features of the present claimed invention.

Regarding claims 45-50, claims 45-50 are allowable for the reasons given in claim 44 because of their dependency status from claim 44.

Regarding claim 62, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 62, specifically for the limitation of a) providing a photonic crystal having a predetermined crystallographic axis and a photonic band-gap adapted to block selected wavelengths of light; and b) surrounding the light source with the photonic crystal while aligning the predetermined crystallographic axis parallel to the longitudinal axis of the light source in combination with other claimed features of the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sachs et al. (US 6,596,224) is cited to show jetting layers of powder and the formation of fine powder beds thereby.

Oh et al. (US PUB 2005/0172673) is cited to show a method for manufacturing preform for photonic crystal fiber.

Enokido (US PUB 2006/00881171) is cited to show a method for producing photonic crystal.
